

Definition of Done for a Task:

Correct thing built, and does what is expected.

Code pushed to repo branch/master.

Code meets standards, ie some comments and variables that are well-named.

Code reviewed by team member, or walkthrough performed.

External/Public API documented (if required for task).

Definition of Done for a User Story:

All tasks completed.

Code in branch/master.

Tests performed and passed for acceptance criteria.

User documentation/help functionality completed.

Inspected and accepted by Product Owner, and Subject Matter Expert.
